PAPER TESTING ASSOCIATION

CORRUGATED BOARD Testing Equipment

Test Description :

An easy to operate manual device.

The FCT circular cutter is placed on the corrugated board sample, which is held by pins while cutting. By turning the crank several rounds the blade cuts through the material slowly. The result is a sample with very precise and smoothly cut edges.

Before the next cut is made the crank must be returned to the starting position.

Models :

- * N36100 : For samples of 100 cm²
- * N3650 : For samples of 50 cm²
