

FCT CIRCULAR CUTTER

Code N36XX

Cutter for corrugated board samples 100 cm² circular for FCT test and grammage.

Applicable Standards : DIN EN 23035

Test Description :

An easy to operate manual device.

The FCT circular cutter is placed on the corrugated board sample, which is held by pins while cutting. By turning the crank several rounds the blade cuts through the material slowly. The result is a sample with very precise and smoothly cuts edges.

Before the next cut is made the crank must be returned to the starting position.
