

## Specimen Cutter

**Model No. 2130**

This cutter allows easy sampling of paper and film specimens for tensile and folding endurance. The blade is made of a material strictly selected and processed with meticulous tempering and refined. All these ensure safe use for a long time with sharp cutting performance. A stopper precisely parallel to the counter-blade makes accurate specimens. A cum system interlocks a stopper precisely mounted on the counter-blade with a cutting blade. A specimen-holder that automatically moves downward and upward perfectly secures the specimen. So, it is not necessary to hold the specimen with the left hand, ensuring safe and easy operation.

### Specifications

<b>Cutting Length:</b>	320mm
<b>Cutting Width:</b>	15mm
<b>Base:</b>	330 x 370mm
<b>Referential Standards:</b>	ISO 8787, JIS P-8141-2004
<b>Outer Dimensions:</b>	420 x 570 x 100mm
<b>Instrument Weight:</b>	10kg
