

Sample Punch

Model No. 2128

For physical tests, it is important to easily prepare accurate specimens. This device prepares specified specimens by punching with male and female dies, instead of conventional cutter blade. The punching edges are made of a strictly selected material, processed with a high precision after the specified thermal treatment. The cutting performance is durable for a long time.

Specimen Dimensions

- A. 15mm wide x 250mm long (for tensile test).
Outer dimensions 560 x 210 x 880mm weight 34kg
- B. 12.7mm wide x 152.4mm long (for ring crush test).
Outer 510 x 210 x 610mm weight 29kg
- C. 15mm wide x 110mm long (for folding test).
Outer dimensions 500 x 210 x 610mm weight 28kg
