

Wet Tensile Strength Tester

Model No. 2000-CW

A specially designed wetting water supply device is mounted on the standard horizontal tensile tester. Dropping water from a dispenser, you can easily measure the wet tensile strength with this machine. Immediately after water in the dispenser is dropped on the specimen, the tensile test is performed. The amount of wetting water and the timing of test start after water dropping can be set as desired

Outer Dimensions: 580 x 430 x 400mm
Weight: 41 kg
