

DIGITAL COUNTER BENCH FOR TISSUE ROLLS

Code: PTA-010304

The digital counter bench has been designed to measure any type of tissue roll wound on any type of tube. The length of the rolls, especially of the industrial ones, is getting longer and keeping well calibrated reels is fundamental to have a stable product. This instrument is simple to use. It does not require operator monitoring during the test since it will automatically stop at the end of the roll.

CHARACTERISTICS:

- Automatic/adjustable unwinding system
- Adjustable for virtually all tissue rolls
- Anti-sticking system for the unwind process using compressed air
- Digital display with detection of the tissue roll photocell
- Automatic stop of the instrument at the end of the roll
- CE Mark
- Electrical connection: 220V 50Hz / 110V 60Hz
- Air supply: Filtered 6 bar
- Weight and dimensions (equipment only): 25 kg / 568 x 700 x 200 mm (W x L x H)
- Weight and dimensions (with packaging): 50 kg / 700 x 700 x 350 mm (W x L x H)
