

**Niagara Beater  
(with Wash Drum)**

**Model No. 2506**

This machine is widely used as a standard tester per JIS and TAPPI. Unlike the conventional beater, the roll is fixed, and a constant load is applied on the head plate, thereby constantly giving a uniform beating pressure. It is excellent especially in free beating and wet beating. So, it is very effective for quality management.

**Specifications**

<b>Capacity:</b>	23 liters
<b>Material of Wash Drum:</b>	frame of brass, plain-woven wire 80 mesh
<b>Rotation Speed of Wash Drum:</b>	10rpm
<b>Driving Motor of Wash Drum:</b>	100VAC 0.065kW 50/60Hz
