

Mini-Size Autoclave

Model No. 2616

This autoclave is for timber chip cooking tests in a university laboratory, etc. As such, the cooking chamber is small-sized and can be heated on a gas burner, which is suited for a simple pulping experiment. By removing the fixing pins supporting the chamber body, it can be shaken sideways, helping even permeation of the liquor into chips.

Specifications

Capacity:	500cc
Material:	SUS-316
Pressure:	max. 1.5MPa
Pressure Gauge:	2MPa
Heating:	by gas burner
Accessories:	safety valve, gas purge valve, thermometer pocket, thermometer 300°C, Bunsen burner
Outer Dimensions:	240 x 240 x 540mm
Instrument Weight:	10kg
