

# **KRK** KUMAGAI RIKI KOGYO

## Agitation Type Square Sheet Machine

Model No. 2559-II

Like the square sheet machine No.2555, this machine makes square sheets. The suspension liquid is rotated by the motorized agitator blade to apply shear force to the specimen, thereby simulating more faithfully the specimen behavior on the Fourdrinier sheet machine. Easy operation with the pneumatic up-and-down system of the agitator and drainage by push-button. Handmaking of a large amount of sheets can be done without fatigue.

<b>Agitator</b>	pneumatic up-and-down system
<b>Drainage Valve</b>	pneumatic ball valve or solenoid valve
<b>Outer Dimensions</b>	1,200×850×1,630mm
<b>Instrument Weight</b>	155kg
