

## ***Centrifugal Separator for Measurement of Pulp (WRV)***

*Model N4000*

For the determination of the water retention ability of pulp samples. Water retention value (WRV) test.

### ***Specifications***

- Refrigerated powerful cooling unit
- Automatic recognition of rotors
- Free rotors speed up to 4500 r / min or 3859 xg
- Intuitive graphic display 2 buttons. Memory 10 programs.
- Programming in t / min or acceleration xg, simultaneous display of two values
- Adjustable Acceleration: maximum or progressive.
- Braking 3 positions: maximum, progressive, or simple inertia of the rotor.
- Automatic lid opening and audible signal activated at the end of cycle.
- Motor brushless, maintenance free, extremely quiet
- Equipped: a free 4-position rotor, 4 round nacelles, 4 racks and 4 test cells WRV 3 sampling areas
- Speed range between 100 and 14,500 rpm
- Electrical Connection: 230 V 60 Hz
