

PAPER Testing Equipment

PAPER TESTING ASSOCIATION

PTA Chip Classifier (5-tray)

Code IDM-070502

Classifies wood chips of different sizes.

Standards: TAPPI UM 21, SCAN CM 40/88

DEVICE DESCRIPTION:

Wood chips classifier of 4 or 5 trays of different sizes to control the operation of woodchippers. Equipment for the paper industry and paste/pulp manufacturers. Trays made of aluminum to lighten them, and low-sonority equipment to maintain a healthy work environment. Very robust equipment to work in the most difficult conditions of the factory.

TECHNICAL SPECIFICATIONS:

- Robust classifier with light trays for easy handling.
- Standard supply of sorting trays.
- Circular holes 45mm in diameter, 8mm rods, circular holes 13mm, 7mm and 3mm in diameter, fine collection tray.
- Low work sonority for workers labor security.
- CE Marking
